Solution

Food4Good

How it works?

We collaborate with supermarkets and grocery stores by providing a way to preserve expiring soon items and make a positive social impact by donating it for people that needs them.

As a supermarket owner

Our app allows the supermarkets to
upload the
list of expiring soon products and
inform the benefiter

As a benefiter

As a benefiter, you can login to the app and you will get access to all the free items near your location and pick it up from stores at anytime

Achievement

- 1) Limit the waste food and protect the environment
- 2) Provide food access to everyone
- 3) Save energy
